

Forest Land Transition Planning Workshops

LEARN ABOUT:

- Transferring and managing farm and forest assets at the retirement, disability or death of the principal managers and owners
- Wills and trusts
- Immediate and long-term use of business entities and agreements
- Decisions families should make prior to visiting legal and tax advisers
- Sample case studies

THE SPEAKERS:

Andrew Brannan, an attorney in private practice, provides business and estate planning support to landowners who want to keep their farms, forests and other natural resource concerns growing and productive as they pass to the next generation.

Guido van der Hoeven, an Extension specialist and senior lecturer at N.C. State University, has 30+ years of experience helping farm and timber landowners articulate goals for their businesses including a review of profitability, methods for transferring assets and management, tax issues and when landowners should initiate the transfer process. He works to blend the needs of the exiting generation with the needs of the incoming generation.
